SmartHire Match Insights

Based on your profile, you are in the top 5% of applicants. Your experience with Figma and Material 3 perfectly aligns with CloudScale's tech stack.

The Role

As a Senior Product Designer at CloudScale, you will be the editorial voice behind our next-generation cloud infrastructure dashboard. We aren't looking for someone to just push pixels; we need a curator who understands how to turn complex data into elegant, actionable insights.

You will collaborate closely with engineering and product leadership to define our "Intelligent Curator" design philosophy, ensuring consistency across a platform that processes billions of data points daily.

Key Responsibilities

- Lead the evolution of our enterprise design system, focusing on tonal layering and accessible data visualization.
- Translate complex cloud infrastructure metrics into intuitive, "glass-morphic" UI components.
- Mentor junior designers and lead weekly design critiques to foster a high-performance creative culture.
- Work directly with customers to validate prototypes and iterate on user-centric workflows.

Requirements

- 5+ years Uử/UI Experience
- Design System Architecture
- HTML/CSS Knowledge
- Advanced Figma & Prototyping
- B2B SaaS Background
- User Research Proficiency

Perks & Benefits

Equity Package
Early stage stock options

Unlimited PTO
Take the time you need

Home Office Stipend
$2,500 setup budget
